The philosophical  
foundation of  
emancipatory  
knowledge lies in  
critical theory. In this

rejected but are limited.

If we do not question  
current scientific and  
social theories and  
accepted truths, we may  
never realize how we  
are constrained by their  
inevitable distortions  
and errors. Without the  
possibility of critical

and our beliefs, such  
constraining knowledge  
can be accepted by  
entire cultures. The  
research paradigm that  
is relevant for  
constructing this kind of  
knowledge is the critical  
paradigm. Data are  
always qualitative and  
have specific methods  
of research. Quantitative  
research unquestionably  
has a place and is

fundamental to  
scientific advances, but  
qualitative research  
delves into what it is to  
be human. Through  
qualitative research, we  
gain insight into  
communicative  
knowledge, its rich  
nature, and the  
mechanisms by which  
communicative  
knowledge is formed  
and interpreted.
