## **Lathe Series Training Manual Haas CNC Lathe Programming**

Manual programming for a CNC mill or lathe has been the most common way to program over the years that CNC machines have been used. Manual programming is done either by hand and transferred to a computer file, or punched in by hand on the machine controller.

## **Manual CNC Programming - Pros & Cons | CNC Machinist Training**

A computerized numerical control (CNC) machine controls the tool with a computer and is programmed with a machine code system that enables it to operate with repeatability and minimal supervision. The same principles used in operating a manual machine are used in programming a CNC machine. The main difference is that instead of using handles to position the tool to a certain location, the ...

The CNC Lathe can make the same basic moves as the mill-G01 for lines and G02/03 for arcs (plus G00 for rapid motion in a straight line). The difference is you can mostly ignore the Y coordinate (though there are lathes that have Y too!). Just leave it out of the programs, and don't use the corresponding incremental "J" or "V" either.
