The Courage to Be Disliked, already an enormous bestseller in Asia with more than 3.5 million copies sold, demonstrates how to unlock the power within yourself to be the person you truly want to be. Is happiness something you choose for yourself? The Courage to Be Disliked presents a simple and straightforward answer. Using the theories of Alfred Adler, one of the three giants of nineteenth-century psychology alongside Freud and Jung, this book follows an illuminating dialogue between a philosopher and a young man. Over the course of five conversations, the philosopher helps his student to understand how each of us is able to determine the direction of our own life, free from the shackles of past traumas and the expectations of others. Rich in wisdom, The Courage to Be Disliked will guide you through the concepts of self-forgiveness, self-care, and mind decluttering. It is a deeply liberating way of thinking, allowing you to develop the courage to change and ignore the limitations that you might be placing on yourself. This plainspoken and profoundly moving book unlocks the power within you to find lasting happiness and be the person you truly want to be. Millions have already benefited from its teachings, now you can too.

Cheng & Tsui's best-loved Chinese textbook series is new, revised, and better than ever!

This book provides a new way of studying grammar. The basic thrust of the book is to investigate grammar based on a prosodic unit, the intonation unit (IU), in spontaneous speech. The author challenges the dominant practice in the study of syntax, which has been to focus on the unit of the artificially constructed sentence. The book shows that some basic notions developed from sentence-level data often do not account well for speech data. For example, in many versions of syntactic theory, the basic syntactic structure of any sentence is assumed to comprise both an NP and a VP (with variations in terminology). However the author shows that a Mandarin sentence in spoken discourse can consist of a lone NP or a transitive verbal expression without any explicit argument (which is not due to anaphora). Although the book concerns Mandarin discourse and grammar, it will be of interest to students of a wide range of fields, including discourse analysis, syntax, conversation analysis, prosodic studies, and typological studies.
