Into the deep: electrifying subsea oil and gas operations. In some of the most challenging conditions found anywhere in the world, far offshore, and deep below the waves, Saft batteries deliver safe and reliable power for the new generation of electrified subsea oil and gas projects. Even as the world pushes for renewable energy, the global demand for fossil fuels is still rising.

In traditional wells, hydraulic fluid flows from a facility above the surface of the water into a subsea well through specialised pipes, which is used to power the well's hydraulic equipment, which pumps the oil back to the surface. By electrifying the system, high-pressure equipment such as the hydraulic pipes are removed, reducing the risk of explosions arising from faulty pipes, and eliminates the threat of a pipe leaking, and spilling hydraulic fluid into the surrounding ocean.
