~~Freud ultimately, in light of Eckstein's history of adolescent self-cutting and irregular nasal (and menstrual) bleeding, concluded that Fliess was "completely without blame", as Eckstein's post-operative haemorrhages were hysterical "wish-bleedings" linked to "an old wish to be loved in her illness" and triggered as a means of "rearousing [Freud's] affection".~~

~~Sigmund Freud—Wikipedia~~

~~Freud had loved books from an early age. In 1868, aged 12, he won a prize at school in the form of a book: Friedrich von Tschudi's Animal Life of the Alps. He was bored by many of the texts in his school's library, though ambitious in his own reading. He tackled T.H. Buckle's The History of Civilization in England as a teenager.~~

Sophie Freud: While Freud's notions of female sexuality often ran contrary to the patriarchal tendencies of the Victorian era, he was still very much a man of his time. His work is often dismissed as misogynistic and his own granddaughter, Sophie Freud, described his theories as outdated. "His ideas grew out of society. He mirrored in his theories the belief that women were secondary and were ...

Most people however trace modern-day psychotherapy back to Sigmund Freud in the 1800s. While working as a neurologist with 'neurotic' patients, he came to the conclusion that mental illness was the result of keeping thoughts or memories in the unconscious.

~~The history of counselling - Counselling Directory~~

Freud: The Mind of the Moralist is a book about Sigmund Freud, the founder of psychoanalysis, by the sociologist Philip Rieff, in which the author places Freud and psychoanalysis in historical context. Rieff described his goal as being to "show the mind of Freud... as it derives lessons on the right conduct of life from the misery of living it." One of Rieff's most influential writings, Freud: The Mind of the Moralist has been called "brilliant" and a "great book". It helped to establish Rieff's

~~The History of the Psychoanalytic Movement: Amazon.co.uk ...~~

Freud's psychoanalysis is both a theory and therapy. Sigmund Freud (writing between the 1890s and the 1930s) developed a collection of theories which have formed the basis of the psychodynamic approach to psychology. His theories are clinically derived - i.e., based on what his patients told him during therapy.
