Family History Shop - The Genealogist: Shop

The USGenWeb Project was launched in 1996, initially as a genealogy database for Kentucky. Since then, it's branched out to incorporate genealogy records for all 50 states, which are treated to a comprehensive range of census records, military records, obituaries, newspapers, and maps. This makes it one of the most detailed free ancestry websites on the web, although it has to be noted that its site map is quite sprawling and takes some getting used to before you can navigate it with ease.

Genealogical Software Programs - American Ancestors

Genealogy software is any computer software used to record, store, organise and/or publish genealogical data. It may be in the form of free or purchased software packages run on a user's computer such as FamilyTreeMaker or Legacy, cloud based (which are services hosted on the Internet) such as those provided by Ancestry or FamilySearch.org or increasingly software in the form of "apps" running on mobile phones and other handheld devices.
