Perspectives in Lexicology and Corpus Linguistics offers an introduction to words and corpus linguistics. From this foundation it explores the much wider issues that are inevitably raised but somehow marginalized in lexicology (the study of words) and corpus linguistics: how are individual words integrated into language? What are the real benefits of studying the large quantities of text now available in corpora? How do we best conceptualize meaning itself?>

What could he tell her now, now that he was forty and she was no longer 17? He is a failed writer turned diplomat, an anarchist learning the value of discipline. He moves in a world which takes him from the Australian wilderness to the conference rooms of Vienna and Geneva; from the whore-house to warzone he feels the pull of the genetic spiral of his ancestry. At the sharp axis of his mid-life he scans the memorabilia of his feelings in the hope of giving answers. In his first full-length novel Moorhouse presents a roving, dissatisfied man entering middle age in a house-of-mirrors portrait: fragmentary and multifaceted. Sean, a hard-drinking, hard-living Australian, has just turned 40; the other half of the title refers to a precocious schoolgirl who is one of his many liaisons. The most important of the other women who drift into and out of his life include his ex-wife Robyn, now unflinching in the face of cancer; Belle, Sean's fellow sexual adventurer; and Edith Campbell Berry, an aging iconoclast whom Sean encounters in Vienna and Israel. Forty-Seventeen is told with characteristic Moorhouse style - candid, wryly insightful and morbidly comic - and, in this resonant and acclaimed book achieves a new virtuosity.

Presents a concise survey of lexicology. This book surveys the study of words, providing an overview of basic issues in defining and understanding the word as a unit of language. It also examines the history of lexicology, the evolution of dictionaries and developments in the field. It is of interest to undergraduate students of linguistics.
