From avalanches to glaciers, from seals to snowflakes, and from Shackleton's expedition to The Year Without Summer, Bill Streever journeys through history, myth, geography, and ecology in a year-long search for cold -- real, icy, 40-below cold. In July he finds it while taking a dip in a 35-degree Arctic swimming hole; in September while excavating our planet's ancient and not so ancient ice ages; and in October while exploring hibernation habits in animals, from humans to wood frogs to bears. A scientist whose passion for cold runs red hot, Streever is a wondrous guide: he conjures woolly mammoth carcasses and the ice-age Clovis tribe from melting glaciers, and he evokes blizzards so wild readers may freeze -- limb by vicarious limb.

When a meteorite lands in Surrey, the locals don't know what to make of it. But as Martians emerge and begin killing bystanders, it quickly becomes clear England is under attack. Armed soldiers converge on the scene to ward off the invaders, but meanwhile, more Martian cylinders land on Earth, bringing reinforcements. As war breaks out across England, the locals must fight for their lives, but life on Earth will never be the same. This is an unabridged version of one of the first fictional accounts of extraterrestrial invasion. H. G. Wells's military science fiction novel was first published in book form in 1898, and is considered a classic of English literature.

This collection of thirteen essays by writers from several countries lavishly celebrates the centenary of the publication of Conrad's *The Secret Agent*. It reconsiders one of Conrad's most important political novels from a variety of critical perspectives and presents a stimulating documentary section as well as specially commissioned maps and new contextualizing illustrations. Much new information is provided on the novel's sources, and the work is placed in new several contexts. The volume is essential reading on this novel both for students studying it as a set text as well as for scholars of the late-Victorian and early Modernist periods.

Originally published in 1991. Focusing on "boys' own" literature, this book examines the reasons why such a distinct type of combative masculinity developed during the heyday of the British Empire. This book reveals the motives that produced this obsessive focus on boyhood. In Victorian Britain many kinds of writing, from the popular juvenile weeklies to parliamentary reports, celebrated boys of all classes as the heroes of their day. Fighting fit, morally upright, and proudly patriotic - these adventurous young men were set forth on imperial missions, civilizing a savage world. Such noble heroes included the strapping lads who brought an end to cannibalism on Ballantyne's "Coral Island" who came into their own in the highly respectable "Boys' Own Paper", and who eventually grew up into the men of Haggard's romances, advancing into the Dark Continent. The author here demonstrates why these young heroes have enjoyed a lasting appeal to readers of children's classics by Stevenson, Kipling and Henty, among many others. He shows why the political intent of many of these stories has been obscured by traditional literary criticism, a form of criticism itself moulded by ideals of empire and "Englishness". Throughout, imperial boyhood is related to wide-ranging debates about culture, literacy, realism and romance. This is a book of interest to students of literature, social history and education.

From the New York Times bestselling author of *My Paris Kitchen* and *L'Appart*, a deliciously funny, offbeat, and irreverent look at the city of lights, cheese, chocolate, and other confections. Like so many others, David Lebovitz dreamed about living in Paris ever since he first visited the city and after a nearly two-decade career as a pastry chef and cookbook author, he finally moved to Paris to start a new life. Having crammed all his worldly belongings into three suitcases, he arrived, hopes high, at his new apartment in the lively Bastille neighborhood. But he soon discovered it's a different world en France. From learning the ironclad rules of social conduct to the mysteries of men's footwear, from shopkeepers who work so hard not to sell you anything to the etiquette of working the right way around the cheese plate, here is David's story of how he came to fall in love with and even understand this glorious, yet sometimes maddening, city. When did he realize he had morphed into un vrai parisien? It might have been when he found himself considering a purchase of men's dress socks with cartoon characters on them. Or perhaps the time he went to a bank with 135 euros in hand to make a 134-euro payment, was told the bank had no change that day, and thought it was completely normal. Or when he found himself dressing up to take out the garbage because he had come to accept that in Paris appearances and image mean everything. Once you stop laughing, the more than fifty original recipes, for dishes both savory and sweet, such as Pork Loin with Brown Sugar Bourbon Glaze, Braised Turkey in Beaujolais Nouveau with Prunes, Bacon and Bleu Cheese Cake, Chocolate-Coconut Marshmallows, Chocolate Spice Bread, Lemon-Glazed Madeleines, and Mocha Crème Fraîche Cake, will have you running to the kitchen for your own taste of Parisian living.
