Abstract. Rapid strides have been made in plant biotechnology, including plant tissue culture and conservation techniques. The newly acquired knowledge is now being commonly applied in collection, exchange, multiplication and short- to long-term conservation of genetic resources of crops, especially horticultural crops.

The addition of 60  $\mu\text{M}$  silver thiosulfate (STS) to the MS medium resulted in efficient micropropagation of the finger lime explants and controlled leaf abscission. Key message The study evaluates the efficacy of various silver-containing compounds on their ability to effectively control ethylene production and allow for the development of an efficient tissue culture protocol for Finger lime.

Silver compounds regulate leaf drop and improve in vitro ...  
Jul 31, 2016 - I posted this elsewhere a while ago, but forgot to do it here. Figure some of you might find the information in it useful. Im yet to begin attempting any micropropagation, but will do so one of these days...and its going to be great!
