Hilbert Space Operators A Problem

In a Hilbert space H , a sequence $\{x_n\}$ is weakly convergent to a vector $x \in H$ when.
$$\lim_{n \rightarrow \infty} \langle x_n, v \rangle = \langle x, v \rangle, \forall v \in H.$$

Read Free Hilbert Space Operators A Problem

$\{f_n\}$ $\langle x_{f_n}, v \rangle = \langle x, v \rangle$ for every $v \in H$. For example, any orthonormal sequence $\{f_n\}$ converges weakly to 0, as a consequence of Bessel's inequality.

Solving Approach...

The most important unbounded operators on a Hilbert space are the closed linear operators with a dense domain of definition; in particular, unbounded self-adjoint and normal operators. Between the self-adjoint and the unitary operators on a Hilbert space there is a one-to-one relation, defined by the
