## ICOM R7100 IC-R7100 Receiver - Universal Radio

The IC Chip used is a MAX203 for minimum parts count, but a MAX232 would work just as well. The MAX203 can be obtained from Digi-Key. This interface has also been tested with an Icom R7100. This interface may also work for other radios that use TTL serial levels if another source of 9-12V is available, or 5V if the regulator is left out.

The IC-R7100 is a desktop scanner with many search functions and is particularly simple to use having a rational layout of all the front panel controls. The receiver is divided into two parts, a complete section dedicated to frequencies below 1025 MHz and a part, in practice a conversion module, for higher frequencies up to 2000 MHz.
