by learning creative puzzle-solving skills We solve countless problems—big and small—every day. With so much practice, why do we often have trouble making simple decisions—much less arriving at optimal solutions to important questions? Are we doomed to this muddle—or is there a practical way to learn to think more effectively and creatively? In this enlightening, entertaining, and inspiring book, Edward Burger shows how we can become far better at solving real-world problems by learning creative puzzle-solving skills using simple, effective thinking techniques. Making Up Your Own Mind teaches these techniques—including how to ask good questions, fail and try again, and change your mind—and then helps you practice them with fun verbal and visual puzzles. The goal is

not to quickly solve each challenge but to come up with as many different ways of thinking about it as possible. As you see the puzzles in ever-greater depth, your mind will change, helping you become a more imaginative and creative thinker in daily life. And learning how to be a better thinker pays off in incalculable ways for anyone—including students, businesspeople, professionals, athletes, artists, leaders, and lifelong learners. A book about changing your mind and creating an even better version of yourself through mental play, Making Up Your Own Mind will delight and reward anyone who wants to learn how to find better solutions to life ' s innumerable puzzles. And the puzzles extend to the thought-provoking format of the book itself because one of the later short chapters is printed upside

An overlooked classic of Italian literature, this epic and unforgettable novel recounts one man's long and turbulent life in revolutionary Italy. At the age of eighty-three and nearing death, Carlo Altoviti has decided to write down the confessions of his long life. He remembers everything: his unhappy childhood in the kitchens of the Castle of Fratta; romantic entanglements during the siege of Genoa; revolutionary fighting in Naples; and so much more. Throughout, Carlo lives only for his twin passions in life: his dream of a unified, free Italy and his undying love for the

magnificent but inconstant Pisana. Peopled by a host of unforgettable characters - including drunken smugglers, saintly nuns, scheming priests, Napoleon and Lord Byron - this is an epic historical novel that tells the remarkable and inseparable stories of one man's life and the history of Italy's unification. Ippolito Nievo was born in 1831 in Padua.

Confessions of an Italian, written in 1858 and published posthumously in 1867, is his best known work. A patriot and a republican, he took part with Garibaldi and his Thousand in the momentous 1860 landing in Sicily to free the south from Bourbon rule. Nievo died before he reached the age of thirty, when his ship, en route from Palermo to Naples, went down in the Tyrrhenian Sea in early 1861. He was, Italo Calvino once said, the sole Italian novelist of the nineteenth

century in the 'daredevil, swashbuckler, rambler' mould so dear to other European literatures. Frederika Randall has worked as a cultural journalist for many years. Her previous translations include Luigi Meneghello's *Deliver Us* and Ottavio Cappellani's *Sicilian Tragedee* and Sergio Luzzatto's *Padre Pio: Miracles and Politics in a Secular Age*. Lucy Riall is Professor of Comparative History at the European University Institute. Her many books include *Garibaldi. Invention of a Hero*. 'Of all the furore that came out of the Risorgimento, only Manzoni and Nievo really matter today' - Umberto Eco 'The one 19th century Italian novel which has [for an Italian reader] that charm and fascination so abundant in foreign literatures' - Italo Calvino 'Perhaps the greatest Italian novel of the nineteenth century' - Roberto Carnero 'A spirited

Translating Children ' s Literature is an exploration of the many developmental and linguistic issues related to writing and translating for children, an audience that spans a period of enormous intellectual progress and affective change from birth to adolescence. Lathey looks at a broad range of children ' s literature, from prose fiction to poetry and picture books. Each of the seven chapters addresses a different aspect of translation for children, covering: -

are as universally beloved as Alice ' s Adventures in Wonderland. Now, in this spellbinding historical novel, we meet the young girl whose bright spirit sent her on an unforgettable trip down the rabbit hole—and the grown woman whose story is no less enthralling. But oh my dear, I am tired of being Alice in Wonderland. Does it sound ungrateful? Alice Liddell Hargreaves ' s life has been a richly woven tapestry: As a young woman, wife, mother, and widow, she ' s experienced intense passion, great privilege, and greater tragedy. But as she nears her eighty-first birthday, she knows that, to the world around her, she is and will always be only “ Alice. ” Her life was permanently dog-eared at one fateful moment in her tenth year—the golden summer day she urged a grown-up friend to write down one

of his fanciful stories. That story, a wild tale of rabbits, queens, and a precocious young child, becomes a sensation the world over. Its author, a shy, stuttering Oxford professor, does more than immortalize Alice—he changes her life forever. But even he cannot stop time, as much as he might like to. And as Alice ' s childhood slips away, a peacetime of glittering balls and royal romances gives way to the urgent tide of war. For Alice, the stakes could not be higher, for she is the mother of three grown sons, soldiers all. Yet even as she stands to lose everything she treasures, one part of her will always be the determined, undaunted Alice of the story, who discovered that life beyond the rabbit hole was an astonishing journey. A love story and a literary mystery, Alice I Have Been brilliantly blends fact and fiction to

capture the passionate spirit of a woman who was truly worthy of her fictional alter ego, in a world as captivating as the Wonderland only she could inspire.

Galileo Galilei ' s Sidereus Nuncius is arguably the most dramatic scientific book ever published. It announced new and unexpected phenomena in the heavens, “ unheard of through the ages, ” revealed by a mysterious new instrument. Galileo had ingeniously improved the rudimentary “ spyglasses ” that appeared in Europe in 1608, and in the autumn of 1609 he pointed his new instrument at the sky, revealing astonishing sights: mountains on the moon, fixed stars invisible to the naked eye, individual stars in the Milky Way, and four moons

around the planet Jupiter. These discoveries changed the terms of the debate between geocentric and heliocentric cosmology and helped ensure the eventual acceptance of the Copernican planetary system. Albert Van Helden ' s beautifully rendered and eminently readable translation is based on the Venice 1610 edition ' s original Latin text. An introduction, conclusion, and copious notes place the book in its historical and intellectual context, and a new preface, written by Van Helden, highlights recent discoveries in the field, including the detection of a forged copy of Sidereus Nuncius, and new understandings about the political complexities of Galileo ' s work.
