This research monograph aims at developing an integrative framework of hotel revenue management. It elaborates the fundamental theoretical concepts in the field of hotel revenue management like the revenue management system, process, metrics, analysis, forecasting, segmentation and profiling, and ethical issues. Special attention is paid on the pricing and non-pricing revenue management tools used by hoteliers to maximise their revenues and gross operating profit. The monograph investigates the revenue management practices of accommodation establishments in Bulgaria and provides recommendations for their improvement. The book is suitable for undergraduate and graduate students in tourism, hospitality, hotel management, services studies programmes, and researchers interested in revenue/yield management. The book may also be used by hotel general managers, marketing managers, revenue managers and other practitioners looking for ways to improve their knowledge in the field.

Theories on the origins of war are often based on the premise that the rational actor is in pursuit of material satisfaction, such as the quest for power or for wealth. These perspectives disregard the need for homo symbolicus - meaning the preservation of a positive self-image for both emotional and instrumental reasons. A good reputation ensures authority and material resources. Non-recognition can be as much as an explanation of war as that of other explicative 'variables'. Two empirical studies examining the role of non-recognition in great power conflicts and in international crises will demonstrate the value of this symbolic approach.

International Sport Management, Second Edition, serves as an invaluable guide for students as they build careers that require an understanding of the relationships, influences, and responsibilities of sport management in a global context.
