An internationally renowned wrestler, boxer and gymnast, Imi Lichtenfeld recruited young men who shared his views, but his tactics were no match for armed adversaries. So he focused on creating a form of fighting that combined all the martial arts with a new way of thinking. Tracy Lee Thomas, a master teacher who has been instructing students in the martial arts for more than thirty years, explores how Krav Maga evolved and how to use it to transform your life. He examines its core principles, including:

- Neutralizing threats: This is the first and foremost objective.
- Simplicity: The art consists of holds, strikes, and blocks that are simple and efficient.
- Defense and attack at the same time: By using both techniques in a single

move, you can remove the threat as quickly as possible. Constant motion: The objective is to incapacitate the opponent with a continuous series of movements that are aggressively defensive.

The First World War's centenary generated a mass of commemorative activity worldwide. Officially and unofficially; individually, collectively and commercially; locally, nationally and internationally, efforts were made to respond to the legacies of this vast conflict. This book explores some of these responses from areas previously tied to the British Empire, including Australia, Britain, Canada, India and New Zealand. Showcasing insights from historians of commemoration and

heritage professionals it provides revealing insider and outsider perspectives of the centenary. How far did commemoration become celebration, and how merited were such responses? To what extent did the centenary serve wider social and political functions? Was it a time for new knowledge and understanding of the events of a century ago, for recovery of lost or marginalised voices, or for confirming existing clichés? And what can be learned from the experience of this centenary that might inform the approach to future commemorative activities? The contributors to this book grapple with these questions, coming to different answers and demonstrating the connections and disconnections between those involved in building public knowledge of the 'war to end all

She will have her freedom, no matter the cost... Victoria Brighton refuses to be a pawn to to be played by her stepfather, who will stop at nothing to access her inheritance - including marrying her off to the cold and calculating Duke of Lansingberg. She escapes across the sea to the western prairies, unknowing what is ahead of her but intent that she will never again allow a man to dictate her future. He will honor his promises and hold his family together... Callum McDougall, future chieftan of the McDougall clan, is journeying to the North-West Territories to determine what has become of his missing cousin. Once his mission is complete, he will honor the family tradition and return to Scotland as chieftan to lead his clan.

Diamonds are a multi-billion dollar business involving some of the world's largest mining companies, a million and a half artisanal diggers, more than a million cutters and polishers and a huge retail jewellery sector. But behind the sparkle of the diamond lies a murkier story, in which rebel armies in Angola, Sierra Leone and the Congo turned to diamonds to

finance their wars. Completely unregulated, so-called blood diamonds became the perfect tool for money laundering, tax evasion, drug-running and weapons-trafficking. Diamonds brings together for the first time all aspects of the diamond industry. In it, Ian Smillie, former UN Security Council investigator and leading figure in the blood diamonds campaign, offers a comprehensive analysis of the history and structure of today's diamond trade, the struggle for effective regulation and the challenges ahead. There is, he argues, greater diversification and competition than ever before, but thanks to the success of the Kimberley Process, this coveted and prestigious gem now represents a fragile but renewed opportunity for development in some of the world's poorest nations.
