That said, the KW is still an excellent transformer. Pair up a KW with one of Lionel's better postwar locomotives like a 675, and you'll understand postwar Lionel's enduring appeal. Reconditioned KWs sell for around \$100. As-is or untested KWs can sell for less than \$50, depending on what's missing. Lights and pinout. The KW has a red light that acts as a short-circuit indicator. It is not a power indicator.

Yes, the KW is underated as it and the 1033 are the only two postwar Lionel transformers that will give you a zero starting voltage. Spanky's info is correct BUT if you use the C post as your common ground, then you can use C-A or C-B to get 0-14 volts to the track.

Lionel KW Transformer - Classic Toy Trains Magazine

The Lionel LW Trainmaster is a 125 watt transformer that Lionel produced from 1955 to 1966. They are reasonably durable and Lionel made them for a long time. That means you can find them easily on the secondary market. They can be expensive if they have their original box and paperwork.
