Managing In Academics A Health Center Model [PDF, EPUB, EBOOK]

Many academic health centers seem not to have adequate market access. They wind up overcommitted to tertiary care and lose the balance in their portfolios and, subsequently, money-loss crises follow. All of us know what happens when a money-loss crisis hits an academic health center: consultants come in, they find and identify the wounded, and they execute them.

Rapid response to COVID-19: health ... - Oxford Academic

The majority of people working at universities find their job stressful, and academics are more prone to developing common mental health disorders than those working in other professions, according to a systematic review of published work on researchers' well-being. A lack of job security, limited support from management and the weight of work-related demands on their time were among the factors listed as affecting the health of those who work in higher education.

Academics 'face higher mental health risk' than other ...

The situation of academics with high occupational stress and strong time pressure and calls for slowing down academic life (i.e., "the slow professor", see [21]) suggest mindfulness could be particularly recommended in this context [55]. Mindfulness-based programs could improve academics' mental health as well as time management [56].

Mindfulness-Based Programs Improve Psychological...

The FMLM's Leadership and management standards for medical professionals are articulated as a set of core values and behaviours designed to work across all career levels. FMLM believes an effective medical leader is defined by how and what they do, under-pinned by why they do it.

Our 2020 Health and wellbeing at work survey report, in partnership with Simplyhealth, finds that 'management style' is the second main cause of work-related stress. This finding is a stark reminder of the negative impact people managers can have on people's mental wellbeing, if they are not trained and supported to go about their management role in the right way.

Mental Health in the Workplace | Factsheets | CIPD

Objective: To describe the implementation of technological support important for optimizing clinical management of the COVID-19 pandemic. Materials and methods: Our health system has confirmed prior and current cases of COVID-19. An Incident Command Center was established early in the crisis and helped identify electronic health record (EHR)-based tools to support clinical care.

Breathlessness Management Resources Breathlessness is a common and distressing symptom in many advanced long term diseases, causing considerable disability, anxiety and social isolation. Both the person who suffers from it and those closest to them can become anxious and sometimes depressed and worried by the impact of breathlessness.
