This technique combines microincisions limited to the buccal side that will allow for the use of the piezoelectric knife and selective tunneling that allows for hard or soft tissue grafting. The practice of orthodontics is largely dependent on the availability of anchorage.

Piezocision - Orthodontically Driven Corticotomy - Wiley ...

Corticotomy was introduced to surgeons in order to facilitate maxillary surgery and to orthodontists with the purpose of increasing the rate of tooth movement. There are thus a number of factors that can contribute to the widening of the orthodontic possibilities, and this chapter is dedicated to the demonstration of how the application of skeletal anchorage can contribute to an improved ...
