Pathology Outlines - Adrenal gland & paraganglia
Tumors of the kidneys and the adrenal glands are being diagnosed and treated by physicians of different medical disciplines. For both types of tumor, the pathologic cellular substrate is of crucial importance in diagnosis and therapy.

Renal and Adrenal Tumors - Pathology, Radiology ...
The book is divided into several sections covering anatomy, epidemiology and pathology through molecular genetics and immunobiology to imaging and management and finally renal cancer metastatic disease. Adrenal tumours are covered in one section in part 2 of the book.

Renal and Adrenal Tumours
The description of morphological structures forms the basis for under standing and recognising pathology of the kidneys and adrenals. The con tents of pathological morphology could be extended, as we are of the opinion that the detection and therapy of renal and adrenal tumors are derived from different areas of diagnostic science.

Renal and Adrenal Tumors | SpringerLink
Tumors of the kidneys and the adrenal glands are being diagnosed and treated by physicians of different medical disciplines. For both types of tumor, the pathologic cellular substrate is of crucial importance in diagnosis and therapy.

Renal and Adrenal Tumors | SpringerLink
Adrenal gland tumor begins when the normal healthy cells start to grow abnormally forming a mass. This mass is called as tumor. A benign tumor grows in size but, it does not spread to other parts of the body. A tumor is said to be functioning tumor when it secretes one or more adrenal hormones.

Pathology Outlines - Kidney tumor
Renal medullary carcinoma is a rare type of cancer that affects the kidney.It tends to be aggressive, difficult to treat, and is often metastatic at the time of diagnosis. Most individuals with this type of cancer have sickle cell trait or rarely sickle cell disease, suggesting that the sickle cell trait may be a risk factor for this type of cancer.

Renal medullary carcinoma - Wikipedia
The description of morphological structures forms the basis for under standing and recognising pathology of the kidneys and adrenals. The con tents of pathological morphology could be extended, as we are of the opinion that the detection and therapy of renal and adrenal tumors are derived from different areas of diagnostic science.

Renal and Adrenal Tumors - Pathology, Radiology ...
The most up-to-date methods of tumor diagnosis by CT, NMR, and ultrasound are covered, as are methods of catheter embolization and radiation techniques in case of primarily inoperable tumors. Contents: Pathology of Renal and Adrenal Neoplasms; Ultrasound Diagnosis of Renal and Pararenal Tumors; Computed-Body-Tomography of Renal Carcinoma and Perirenal Masses; Magnetic Resonance Imaging of Renal Mass Lesions; I-125 Embolotherapy of Renal Tumors; Adrenal Mass Lesions in Infants and Children ...

Renal and adrenal tumors: Pathology, radiology ...
Background: The resection of tumor thrombus of the inferior vena cava (IVC) and right atrium (RA) increases the survival rate of patients with renal/adrenal cancer. Objective: To evaluate the surgical procedure in cases of IVC and RA in the treatment of renal and adrenal tumors. Methods: Fourteen patients undergoing surgical intervention (during the period) between January 1997 and June 2007 ...

Renal and adrenal tumors with cardiac invasion: immediate ...
Patients with adrenal metastases tend to have large primary renal tumors that nearly encompass the entire kidney . Adrenal metastases result from direct extension of the renal tumor, lymphatic spread from involved retroperitoneal nodes, retrograde venous embolization and local vascular spread through vessels within Gerota's fascia .

Renal cell carcinoma with bilateral synchronous adrenal ...
Tumors of the kidneys and the adrenal glands are being diagnosed and treated by physicians of different medical disciplines. For both types of tumor, the pathologic cellular substrate is of crucial importance in diagnosis and therapy.

Renal and Adrenal Tumors Pathology, Radiology ...
Types of Renal Tumors. Renal tumors are grouped by where they start growing and by their structure. The main classes of tumors are: Renal Cell Carcinomas (RCC). These are the most common malignant kidney tumors. They are found in the lining of the small tubes in the kidney. RCC may form as a single tumor within a kidney.

What is a Renal Mass and What is a Localized Renal Tumor ...
OBJECTIVE: To evaluate the surgical procedure in cases of IVC and RA in the treatment of renal and adrenal tumors. METHODS: Fourteen patients undergoing surgical intervention (during the period) between January 1997 and June 2007, for resection of IVC and/or RA thrombus due to renal or adrenal tumors, were retrospectively evaluated.

Renal and adrenal tumors with cardiac invasion: immediate ...
Angiomyolipoma and PEComa are rare tumors descending from perivascular epithelial cells (PECs), with distinctive IHC, morphological, and ultrastructural features. The kidney is the most frequent site of origin, but not the only one; however, adrenal gland angiomyolipomas are extremely rare. We describe two cases being found in the adrenal glands. Given the paucity of literature on the subject, more information on this disease is necessary for diagnosis and treatment.

Angiomyolipoma and Malignant PEComa: Discussion of Two ...
Get this from a library! Renal and Adrenal Tumors : Pathology, Radiology, Ultrasonography, Magnetic Resonance (MRI), Therapy, Immunology. [E Löhr; Lutz-Dietrich Leder] -- After the positive response which followed the first edition of this book 6 years ago, the editors were encouraged to prepare a completely reworked second edition that includes the modern advances in ...

Renal and Adrenal Tumors - Pathology, Radiology ...
Adrenal glands Adrenal cancer is a rare cancer that begins in one or both of the small, triangular glands (adrenal glands) located on top of your kidneys. Adrenal glands produce hormones that give instructions to virtually every organ and tissue in your body. Adrenal cancer, also called adrenocortical cancer, can occur at any age.
