Terrorism: Law and Policy provides a comprehensive socio-legal analysis of issues related to terrorist activity. Aimed at both undergraduate and postgraduate students, the book takes a comparative approach to the law related to terrorism in a number of states, mainly those in Europe, North America, Australia and New Zealand. Beginning with an examination of the background to various currently active terrorist groups, the book focuses on those groups which are currently active and which pose a threat to security, especially at the international level. The chapters take the reader through the legal definitions of terrorism contained in various states' statutory provisions and examine how the courts have interpreted terrorism in those states' jurisdictions. The main aim of any terrorist investigation is prevention and so the book examines the various statutory preventative measures that states have introduced and explores the legal issues surrounding surveillance, terrorism intelligence exchange, radicalisation, use of social media, quasi-criminal provisions, asset-freezing and the nexus between terrorist activity and organised crime. Bringing together a number of themes related to terrorism and security from a uniquely legal perspective, this book builds a comparative picture of the legal counter-terrorism interventions states are adopting to increase co-operation and adopt a more united approach in the face of the international terrorism threat.

This edited collection addresses a number of free speech vs security concerns that are engaged by counter-terrorism law and policy makers across a number of liberal democracies, and explores the delicate balance between free speech and the censoring of views that promote hatred or clash with fundamental democratic values. It does this by looking at the perspectives and level of disagreement between those who consider today ' s counter-terrorism and extremism strategies to be a soft and liberal approach, and those who believe these strategies disproportionately impact freedom of expression and association and non-violent political dissent. The contributors include academics, practicing lawyers, and think-tank analysts who examine whether universities and schools incubators of violent radicalism and debate, and whether the views of ' extremist ' speakers and hate preachers need to be censored. Outside the UK, critical discussion of the regulation of counter-terrorism, extremism, and free speech in other liberal democracies is also offered. This book will be of great interest to researchers and practitioners with interests in extremism, terrorism, civil rights, and freedom of speech.
