~~Velocity~~

Velocity is equivalent to a specification of an object's speed and direction of

Read Online Velocity

motion (e.g. 60 km/h to the north). Velocity is a fundamental concept in kinematics, the branch of classical mechanics that describes the motion of bodies. Velocity is a physical vector quantity; both magnitude and direction are needed to define it.

~~Velocity—Wikipedia~~

Like speed, velocity refers to the rate at which an object is moving—the distance per unit of time. But velocity in physics also includes the direction in which the object is moving, whereas direction has no bearing on an object's speed.

~~Velocity—definition of velocity by The Free Dictionary~~

Velocity definition, rapidity of motion or operation; swiftness; speed: a high wind velocity. See more.
